NICOLAS TONELLI

SENIOR FRONTEND DEVELOPER | REACT · TYPESCRIPT · FRONTEND ARCHITECTURE

Buenos Aires, Argentina | +54 (02932) 15415400 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Senior Frontend Developer with 10+ years of experience building web applications, shaping frontend architecture, and guiding technical decisions in enterprise environments. Strong hands-on React experience developed through independent applications, including functional components and Hooks, application state management, reusable UI, API integration, and Progressive Web App capabilities. Professional experience includes extensive Angular and TypeScript development, micro frontend architecture, technical leadership, and mentoring. Combines practical React development with enterprise-scale frontend engineering experience.

TECHNICAL SKILLS

React & JavaScript: React, NextJS, JavaScript, TypeScript, Hooks, custom hooks, reusable components, performance optimization, React Router, Context API, React Hook Form.

State & Data: Redux Toolkit, React Query / TanStack Query, REST APIs, GraphQL.

Build & Quality: Vite, Jest, React Testing Library; familiar with unit-testing workflows.

Backend & Platform: Firebase (Auth, Firestore, Realtime Database), Node.js / Express.js, Progressive Web Apps, Git.

Additional Frontend: Angular (v2–20), NgRx, RxJS, Nx Monorepo, Micro Frontends, Angular Material, SCSS, i18next.

Leadership: Technical leadership, frontend architecture, mentoring, code reviews, Agile/Scrum, cross-team coordination.

PROFESSIONAL EXPERIENCE

GLOBANT | Jan 2016 – Present

Senior Frontend Developer · Tech Lead

- Contributed to approximately 17 enterprise-scale web application projects, serving as technical lead and frontend architect on 7+ projects.
- Designed and led implementation of a micro frontend platform for a major legal and accounting firm, bringing independent applications from multiple business units together through a unified shell.
- Established frontend technical standards using Angular, TypeScript, and Nx monorepo tooling; the platform initiative continued for more than three years.
- Onboarded and guided four frontend developers and coordinated implementation with three other frontend teams within a 30-person project.
- Acted as a frontend technical reference for architecture decisions, code reviews, and mentoring across projects of varying scale and complexity.
- Collaborated with design, QA, and backend teams through planning, estimation, implementation, and delivery in Agile/Scrum environments.

REACT PROJECTS & OPEN SOURCE

Independent Development | Four live applications with public source repositories

Villarino — Public Transport Schedule PWA | GitHub · Live Demo

React app that helps users check upcoming bus arrivals for selected stops. Built a small Express.js backend to parse timetable data from an existing webpage, with memory caching to reduce repeated requests. The frontend uses functional components and Hooks, Context API with useReducer for app-wide state, responsive mobile-first design, and offline caching/update notifications.

Technologies: React, JavaScript, Hooks, Context API, useReducer, PWA, Express.js, memory-cache

BigTime — Full-Screen Music Clock | GitHub · Live Demo

Music player that plays a user-selected audio file while displaying the current time in full screen. Includes light/dark themes, looping, and controls for clearing stored song data. Combines a React class component using lifecycle methods with functional components and Hooks.

Technologies: React, JavaScript, Vite, Hooks

Infohub — Daily Information Dashboard | GitHub · Live Demo

Personal dashboard designed to keep useful daily information visible at a glance, including USD/ARS exchange-rate information, historical exchange-rate charts, holidays, and news. Built with Next.js 13 and TypeScript, with Progressive Web App support.

Technologies: Next.js 13, React, TypeScript, PWA, React Chartkick

Lot! — Parking Space Marketplace | GitHub · Live Demo

Marketplace for discovering and publishing parking-space listings. Includes search and listing details, bookmarks, and a contact-request workflow in which interested users can request an owner's contact details and owners can accept or decline requests. Forms use validation, with centralized state and multilingual support.

Technologies: React, Redux Toolkit, React Router, Formik, Yup, React-i18next, Vite

EARLIER EXPERIENCE

Freelance Web Developer | Mar 2008 – Aug 2015

Built client websites and web applications independently. Technologies included PHP, HTML/CSS, MySQL, JavaScript, jQuery, and AngularJS.

EDUCATION

Universidad Nacional del Sur | Bahía Blanca | 2007–2015

B.S. Computer Science (Licenciatura en Ciencias de la Computación)

LANGUAGES

Spanish: Native | English: Professional working proficiency; technical reading and writing, conversational, actively improving
